Create your Own Customized Shower Bench

- Bring our template to your fabricator and create your own bench in the size, shape and material of your preference
- The Floating Bench Kit comes in stainless steel satin finish, which coordinates very well with chrome, nickel and other common finishes

Features

- Patented, concealed mounting system stays dry and out of sight, behind tile and backerboard
- Brackets and trims made of #340 stainless steel – extremely strong and corrosion resistant
- Temporary plastic inserts included for wall cut-out, expansion joint, and waterproofing
- Template included for buyer-provided seat top
- Rough kit can be shipped ahead of time for immediate wall closing
- ADA compliant

Components

Rough Kit:

(2) Concealed Brackets
7ga steel, #A1011 grade

(16) Structural Wood Screws + magnetic hex bit
2-12"x1/4" corrosion resistant framing screws

(2) Temporary Inserts

Disposable plastic parts that facilitate cutouts in backerboard and tile, while preventing mounting slots from being covered during wall surface installation

Finished Kit:

(1) Bench Bracket, Left
(1) Bench Bracket, Right
6mm brushed stainless steel, #304 grade

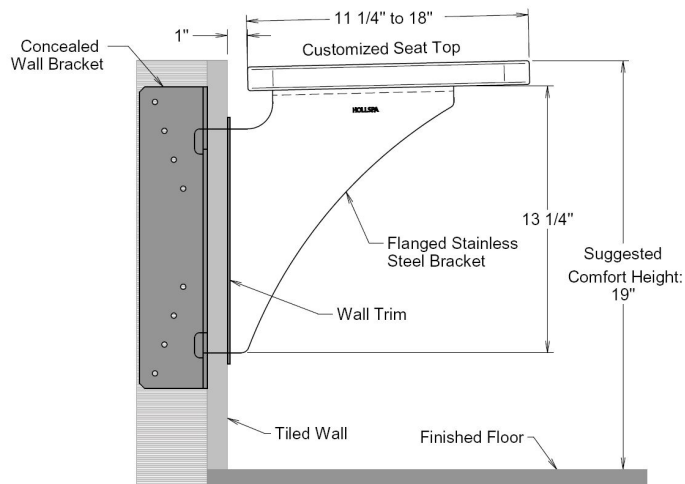

(2) Bracket Trims
3mm brushed stainless steel, #304 grade

(2) Metal/Concrete Epoxy Adhesive
High-impact water-resistant quick-set 2-part epoxy bonds the seat top to the supporting bracket flanges

(1) Seat Top Template
Full size template for buyer-fabricated customized top

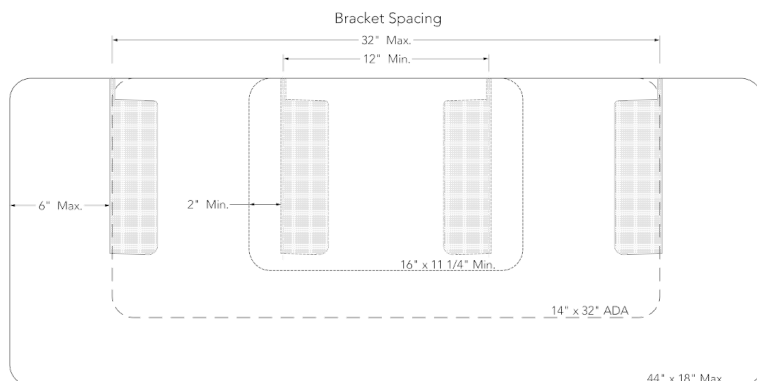

Floating Bench Dimensions

Seat Top Parameters

These are the suggested minimum, standard, ADA and maximum seat top dimensions:

A full-size seat top template is included with the Floating Bench Kit, for buyer-provided fabrication. Use only 3 cm engineered quartz or material of equivalent strength. Seat top must be bonded to flanged brackets with 2-part epoxy provided. Determination of suitability of all other sizes and materials rests upon buyer.

Accessories Available

Inquire about these options:

- Extensions (Left & Right) for longer seat tops and cantilever applications
- Rough Kits for floor mounting use (concrete), CMU wall, and concrete wall
- Support Plate for thin and soft stone seat tops

Notes

- For new and renovation construction – NOT FOR RETROFITING
- Requires structural bracing per instructions
- Not designed to be used as standing platform
