

## Client's testimonial

Two bathrooms renovation in Greenwich Forest, Bethesda MD

1/11/2017

For 30 years my wife and I have owned and lived in our late 1930's center hall colonial in Bethesda. Over the past few years we wanted to remodel our two small 2<sup>nd</sup> floor bathrooms. We contacted several contractors and remodeling companies. We discussed the bathrooms at length with them all and chose to work with Davis Holland Leichsenring of Holland Bath & Spa.

We decided we would get the best bathrooms with Davis. He specializes in creating high end residential bathrooms. His artistic, high quality architectural designs and excellent communication skills were ultimately the reason we went with Holland Bath & Spa. The project went well. We now have two new, beautiful bathrooms that exceed our original expectations. We love them.

The project was constrained by our desire to keep the small bathroom footprints, but to somehow make them feel larger than they actually are. We wanted modern facilities while keeping the traditional feel of our home. Davis lead us though the process, recommending virtually all of the chosen bathroom elements, although at every step he asked for our input. His expertise, decision-making and attention to detail were an integral part of the process. He repeatedly gave us high quality options that fit together seamlessly in a well conceived design.

Davis is a creative architect with excellent project management skills. He gave us regular, detailed project status reports outlining the ongoing schedule and costs compared to the planned schedule and budget. His organized record keeping was reassuring as the project progressed. Throughout the project Davis was always available, in person, to discuss details and concerns. We highly recommend Holland Bath & Spa.
